AI Usage DISCLOSURE FORM

1. **Team Details**

Team Name: TIET_NEXORA

Project / Product Name: Smart Guiding Troubleshooting Engine

Organization / Institution (if any): Thapar Institute of Engineering and Technology

Submission Date: 30-9-26

2. **AI Usage Declaration**

Did your team use any Artificial Intelligence (AI) in developing this project? Yes / No

Yes. AI tools were used as assistants for brainstorming purposes, coding help and debugging.

3. **Purpose of AI Usage (Brief Details)**

Idea generation / brainstorming: Used AI to explore approaches for guided troubleshooting flows. The final ideation direction and novelties were given by the team.

Code generation or assistance: Used for boilerplate and help with modules and files provided. All the code was reviewed and went through multiple rounds of discussion among team members.

UI / UX design: Frontend was developed with AI layout suggestions, but the backend was totally by the team.

Content creation: Used AI only for better choice of words and vocabulary analysis.

Data analysis: Not used

Testing / debugging : Yes, used multiple times for testing and debugging to fasten up the entire process of project generation.

Other: No

4. **Feature Origin Classification (Please add/delete based on the number of the feature)**

1. Feature Name: Natural-language complaint to troubleshooting plan

2. Self-Generated/AI-Generated/Both: Both

3. Description: AI Tool/Platform Used: ChatGPT. Prompt used: "How can we convert a user's vague device problem into clear step-by-step troubleshooting actions?" Output Summary: It suggested breaking the complaint into smaller actions and presenting them in an ordered way. Modification: We changed the suggested structure according to our project's backend and the Samsung troubleshooting data being used.

1. Feature Name: Hybrid semantic retrieval and query enrichment

2. Self-Generated/AI-Generated/Both: Self-Generated

3. Description: AI Tool/Platform Used: Not used for generating this feature. Prompt used: N/A. Output Summary: N/A. Modification: The retrieval approach was decided and implemented by our team based on the project requirements. We worked on how user queries should be matched with relevant troubleshooting information and integrated the retrieval process into the system.

1. Feature Name: Verified Samsung Settings deeplink resolution

2. Self-Generated/AI-Generated/Both: Self-Generated

3. Description: AI Tool/Platform Used: Not used for generating this feature. Prompt used: N/A. Output Summary: N/A. Modification: The team designed this feature to use a predefined set of valid Samsung Settings links. We implemented the resolver so that the system uses links from the trusted catalog instead of generating unsupported URLs.

1. Feature Name: Safety, validation and abstention layer

2. Self-Generated/AI-Generated/Both: Both

3. Description: AI Tool/Platform Used: ChatGPT. Prompt used: "What safety checks should be added to an AI troubleshooting system so that it does not make up unsupported solutions or links?" Output Summary: It suggested checking generated actions, unsupported requests, invalid links, and cases where the system does not have enough information. Modification: We selected the ideas relevant to our project and implemented our own validation and abstention logic.

1. Feature Name: Frontend demonstration interface

2. Self-Generated/AI-Generated/Both: Both

3. Description: AI Tool/Platform Used: ChatGPT. Prompt used: "Suggest a simple interface for entering a device complaint and showing troubleshooting steps clearly." Output Summary: It gave suggestions for arranging the input area and troubleshooting results.

Modification: We used some of the ideas but changed the layout, wording, and styling to match our project and connected it with our backend.

5. **Ethical & Compliance Confirmation**

AI usage complies with guidelines and policies. **Yes**

No proprietary or copyrighted data misused. **I Agree**

The team reviewed AI-assisted outputs before incorporating them and did not treat generated suggestions as authoritative without validation.

6. **Declaration & Sign-Off**

Name of Team Representative: Saumya

Role: Project building, PPT, and demo video

Signature: 

Date: 30-9-26
